EDUCATION

Master of Science in Business Analytics and Project Management

May 2026

University of Connecticut, School of Business – Stamford, CT

GPA: 3.92/4.00

Relevant Coursework: Agile Project Management, Generative AI for Business, Predictive Modeling, Data Mining, Statistics, Financial Analytics

Bachelor of Technology, Computer Science and Engineering

Jul 2024

Indian Institute of Information Technology – Surat, India

GPA: 3.64/4.00

RELATED WORK EXPERIENCE

Digital Frontiers Initiative, UConn School of Business – Stamford, CT

Aug 2025 – May 2026

Student Advisory Board Member

- Authored meeting summaries and white papers for a cross-industry advisory board (PepsiCo, Stanley Black & Decker, Otis, AEFCU), synthesizing strategic discussions on emerging-technology adoption
- Represented 200+ graduate-student perspectives on how AI, analytics, and digital-innovation initiatives translate into workforce-ready curricula and capstone partnerships
- Contributed to strategic planning around industry-sponsored capstone projects, networking events, and experiential learning programs across MS BAPM and undergraduate AIM degree programs

Innovate Labs, University of Connecticut – Stamford, CT

Aug 2025 – May 2026

Student Regional Lead and Lab Tech Specialist

- Led a cross-functional team of 6 via Microsoft Teams Planner, improving task completion by ~25% and growing weekly participation 540% (5 → 32 members)
- Designed and launched 6 technology lab kits (drones, Python-based visualization, robotics) as new offerings, supporting 100+ learners annually
- Delivered 5+ workshops on Generative AI and applied tech with Python and LLM tooling; iterated content from participant feedback, engaging 150+ attendees across campus

Innovate Labs, University of Connecticut – Stamford, CT

Nov 2024 – Jul 2025

Lab Tech Assistant

- Created and maintained technology kits for robotics, data analysis, and visualization tools, supporting smooth delivery of 4 technical lab programs
- Contributed to instructional support and lab programming, helping 30+ learners complete hands-on technology projects aligned with program objectives

University of Connecticut – Stamford, CT

Aug 2025 – Nov 2025

Teaching Assistant

- Managed grading and instructional support for 16 students in UNIV 1820, consistently maintaining 100% on-time feedback across all weekly assignments
- Led 10+ hours of technical support sessions covering analytical tools and applied tech, improving student grades by 15%

Thelios AI – Remote

Feb 2024 – Jul 2024

Data Engineering Intern

- Optimized predictive ML models in Python (Pandas, NumPy, scikit-learn) during sprint cycles, reducing inference time from 3 min to 30 s and improving accuracy by 6%
- Engineered an end-to-end Python ETL pipeline that loaded unstructured information into PostgreSQL, cutting processing time from 10 s to 1 s (90% improvement)

PROJECTS

FactoryTwin Natural Language Analytics Agent – Agentic AI Capstone, Team of 7

Jan 2026 – May 2026

- Led product and technical direction as Project Manager for a 7-person team, defining requirements with sponsor FactoryTwin, architecting the agent workflow, and coordinating delivery across Python, Ollama, and GitHub-based version control

- Built a staged LLM distillation pipeline (Gemma 4, Ministral-3, Llama 3.1 via Ollama) that routes natural language queries to 18 GraphQL endpoints; system achieved 89% overall score, 95% slot extraction accuracy, and 100% crash-free rate across 90+ test queries
- Designed and led the structured evaluation framework and test plan (90+ queries across 10 test sections), driving iterative refinement that improved intent classification from initial baselines to 81% accuracy and ambiguity detection to 81%

Customer Feedback Insights Engine – Agentic AI System, AEFCU

Aug 2025 – Nov 2025

- Developed a multi-agent AI workflow in Python with LLM APIs, analyzing 3,600+ NPS responses across 6 quarters to surface actionable pain points and sentiment trends
- Automated quarterly reporting (previously 7–10 days) via pipelines; translated behavioral intelligence into prioritized enhancements for leadership

AI Health Platform – Agile Product Planning

Jan 2025 – Apr 2025

- Defined a user-centered concept integrating wearable-sensor APIs to deliver personalized, AI-powered health insights for end users
- Created user personas, empathy maps, and detailed acceptance criteria in Jira; owned backlog prioritization and sprint planning to execute Agile roadmap

SQL Cost Control System (using SQLite) – Data Management & Business Process Modelling

Jan 2025 – Apr 2025

- Designed a centralized cost control system using SQLite, integrating 8+ entities and workflows to enable real-time reporting and 90% budget vs. actual convergence
- Developed 5 SQL-based reports that transformed manual processes into structured analytics, reducing reporting time by 30%+ and improving decision-making

Stock Investment Optimization Model – Business Decision Modeling

Jan 2025 - Apr 2025

- Designed a portfolio optimization model using Pyomo, optimizing multi-asset allocation under constraints and enabling data-driven investment decisions
- Simulated 4 rebalancing strategies (buy-and-hold, daily, weekly, monthly), evaluating performance across market conditions and informing strategy selection and portfolio optimization

Popsicles Product Launch – Introduction to Project Management, Team of 6

Aug 2024 – Dec 2024

- Planned a simulated Trader Joe’s new offering launch with market research, risk modeling in Excel, and a metrics-driven roadmap
- Coordinated sprint milestones, backlog grooming, and retrospectives in Jira across a 6-member cross-functional group

SKILLS

Product & Project Management: Agile, Scrum, Product Roadmapping, Product Lifecycle, Product Discovery, User Stories, User Personas, Empathy Mapping, Prioritization Frameworks, OKRs, Backlog Prioritization, Acceptance Criteria, A/B Testing, New Product Development, Process Flow, Cross-functional Collaboration, Jira

Analytics & Research: SQL, Python (Pandas, NumPy, scikit-learn), R, MATLAB, Predictive Modeling, Time Series Forecasting, KPI Instrumentation, Customer Research, User Feedback Analytics, Excel (Advanced)

AI & Systems: LLM Applications, Prompt Engineering, Agentic AI Workflows, ML Pipelines, ETL, Pipelines, PostgreSQL, Ollama, GraphQL

Tools & Certifications: Git, Linux, Microsoft Teams Planner, Pendo Product Analytics | Pendo Product Management Certification, Leadership Certification
